The W. M. Keck Foundation supports high-impact research nationally, undergraduate education regionally, and programs that enrich lives of children and families locally.

What We Fund

- $30 million average annual grant dollars:
  - Science, engineering and biomedical research: 75%
  - Southern California: 15%
  - Undergraduate education: 10%

Eligible Applicant Institutions

- *Research Program* - Research universities and institutions in the USA.
- *Southern California Program* – Community organizations within Los Angeles County.
- *Undergraduate Education Program* - Colleges and universities, especially private, primarily undergraduate institutions in the western USA.

Undergraduate Education

- Promotes distinctive learning and research experiences in science, engineering and the liberal arts, with particular focus on expanding research-based pedagogies in the liberal arts and STEM disciplines.
